WEEKLY MORBIDITY REPORT
EXPLANATORY COMMENT

This report presents each week the annual admission rates per 1000 average strength for certain communicable diseases, venereal diseases, and all causes combined (diseases, injuries and poisonings). Source material is the weekly communicable disease reports submitted to BuMed by all shore stations within the continental limits of the United States.

Admission rates are calculated on an annual basis to facilitate comparison with corresponding annual, quarterly or monthly figures. Such annual rates of admission indicate the number of admissions per 1000 average strength which would occur over a year's time if the current week's experience continued for a year. They are obtained as follows:

$$\frac{\text{Number of Admissions During the Week} \times 52}{\text{Average Strength for the Week}} \times 1000$$

In order to make this report promptly available the figures contained herein are presented, in general, as reported. The symbol # indicates that current data are not available. In such cases, the most recent data are utilized.

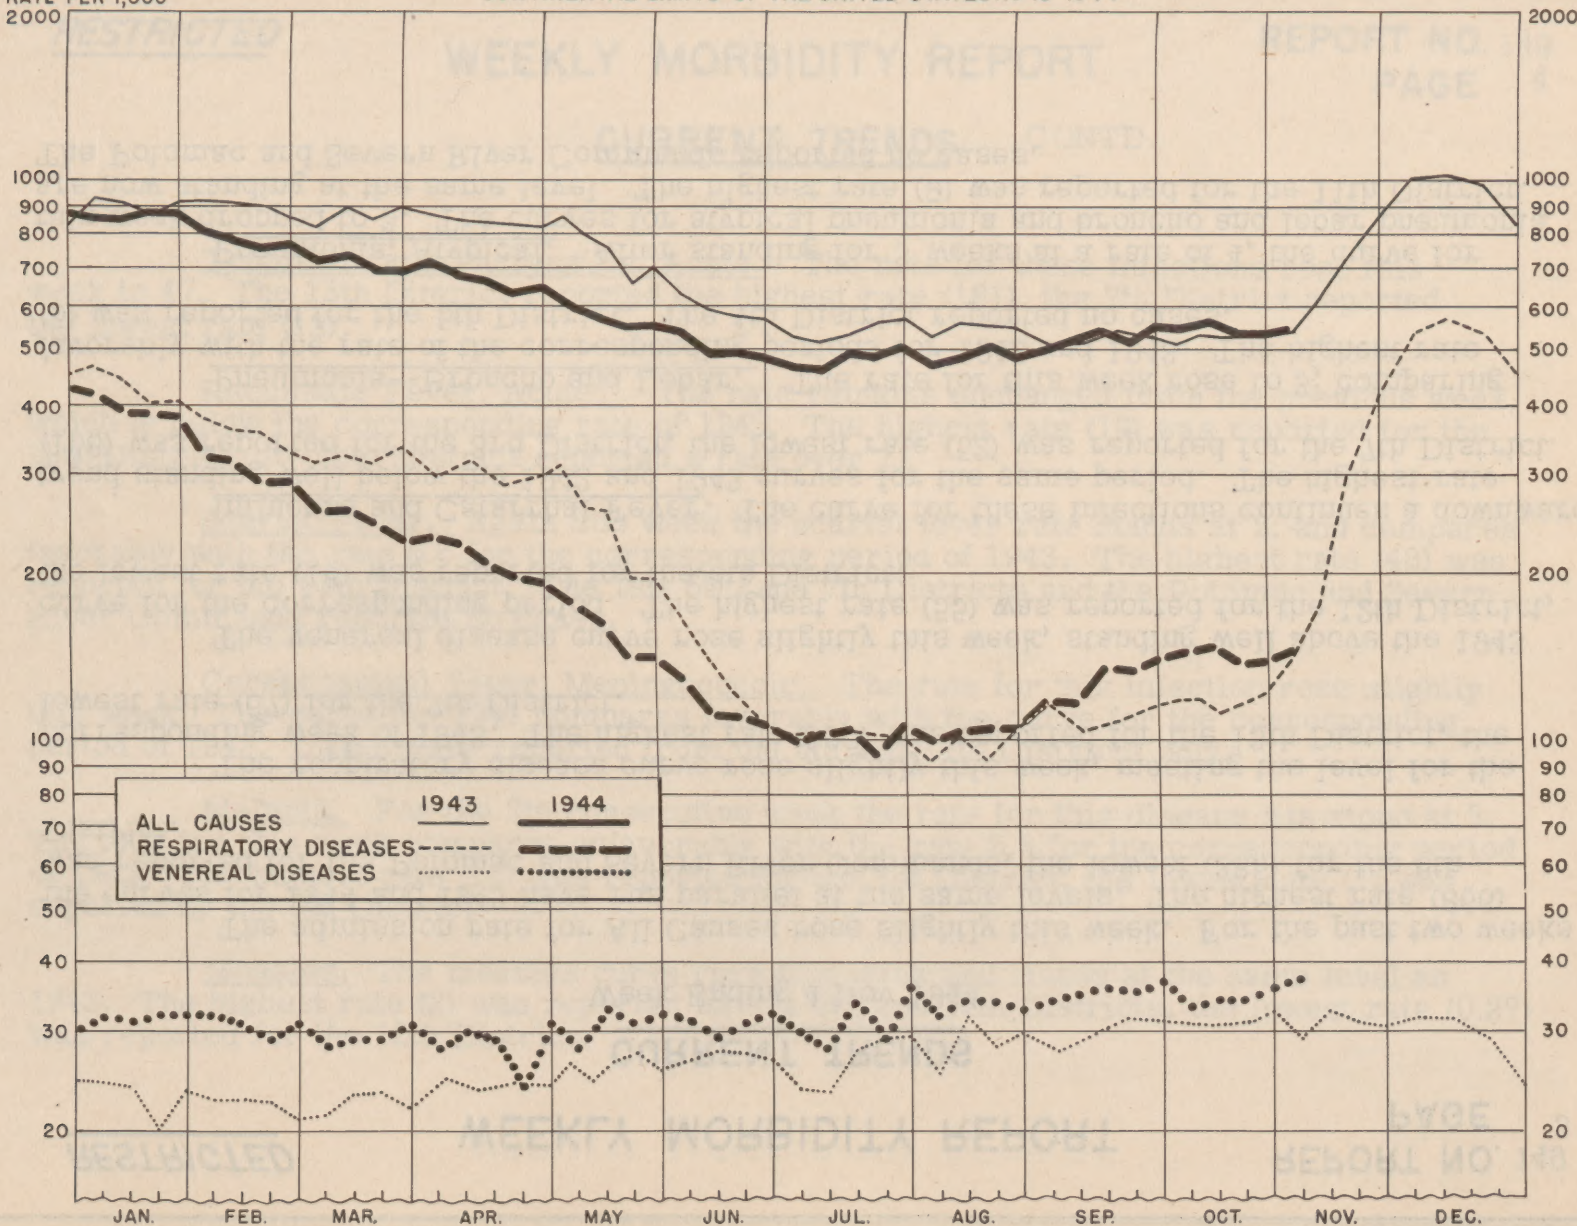

Shore stations with an average strength of 500 or more are listed individually; stations under 500 strength are grouped.

RESTRICTED

CURRENT TRENDS

Week Ending 4 Nov 1944

The admission rate for All Causes rose slightly this week. For the past two weeks the curves for 1944 and 1943 have run parallel at the same levels. The highest rate (866) was reported for the Potomac and Severn River Commands, the lowest (385) for the 6th District.

The respiratory disease curve rose slightly this week, meeting the level for the corresponding week of 1943. The highest rate (300) was reported for the 13th District, the lowest rate (67) for the 7th District.

The venereal disease curve rose slightly this week, standing well above the 1943 curve for the corresponding period. The highest rate (55) was reported for the 12th District, the lowest rate (16) was reported for the 6th District.

Influenza and Catarrhal Fever. The curve for these infections continues a downward trend standing well below the 1942 and 1943 curves for the same period. The highest rate (158) was reported for the 3rd District, the lowest rate (52) was reported for the 7th District.

Pneumonia--Broncho and Lobar. The rate for this week rose to 3; comparing favorably with the rate of the corresponding periods for 1942 and 1943. The highest rate (5) was reported for the 5th District. The 4th District reported no cases.

Pneumonia, Atypical. After standing for 3 weeks at a rate of 4, the curve for this week dropped to 3. The curves for atypical pneumonia and broncho and lobar pneumonia are now standing at the same level. The highest rate (9) was reported for the 11th District. The Potomac and Severn River Commands reported no cases.

PAGE 4

CURRENT TRENDS CONTD.

Tonsillitis and Pharyngitis, Acute. The rate for these infections rose this week to 47. The 13th District reported the highest rate (181), the 7th District reported the lowest rate (12).

Rheumatic Fever, Acute. The rate remains unchanged from the previous week, which is below the corresponding rate of 1943. The highest rate (19) was reported for the 13th District, no other district reported a rate over 1.

Scarlet Fever. Again this week the scarlet fever rate stands at 5, and compares favorably with the rate 6.6 for the corresponding period of 1943. The highest rate (48) was reported for the 13th District. The 1st, 6th, and 7th Districts and the Potomac and Severn River Commands reported no cases.

Cerebrospinal Fever, Meningococcic. The rate for this infection rose slightly this week. The curve for 1944 compares favorably with the curve for the corresponding period of 1943. Cases were reported from the 5th and 11th Districts only.

Malaria. For the 7th consecutive week the rate for this disease has stood at 3. The rate for this week compares unfavorably with the rate 2.3 for the corresponding period of 1943. The highest rate (11) was reported for the 1st District, the lowest rate (1) was reported by the 9th District.

Measles. The measles curve rose this week and stands at the same level as 1943. The highest rate (2) was reported for the 8th and 11th Districts, the lowest rate (0.27) was reported for the 12th District.

REPORT NO. 149
PAGE 5

CURRENT TRENDS CONTD.

Poliomyelitis, Anterior, Acute. No poliomyelitis cases were reported this week among Naval personnel in Continental Shore Stations. The cumulative total of poliomyelitis cases reported for all Continental Stations, Jan. 1, 1944 through Nov. 4, is 67.*

The U.S. Public Health Service reports for this week show the civilian cases in the six States with the highest incidence distributed as follows:

New York	145	Michigan	24
Pennsylvania	34	Illinois	23
Ohio	31	North Carolina	18

* Several of these cases were not reported on Weekly Morbidity Report NavMed-172.
